Yi Hsuan

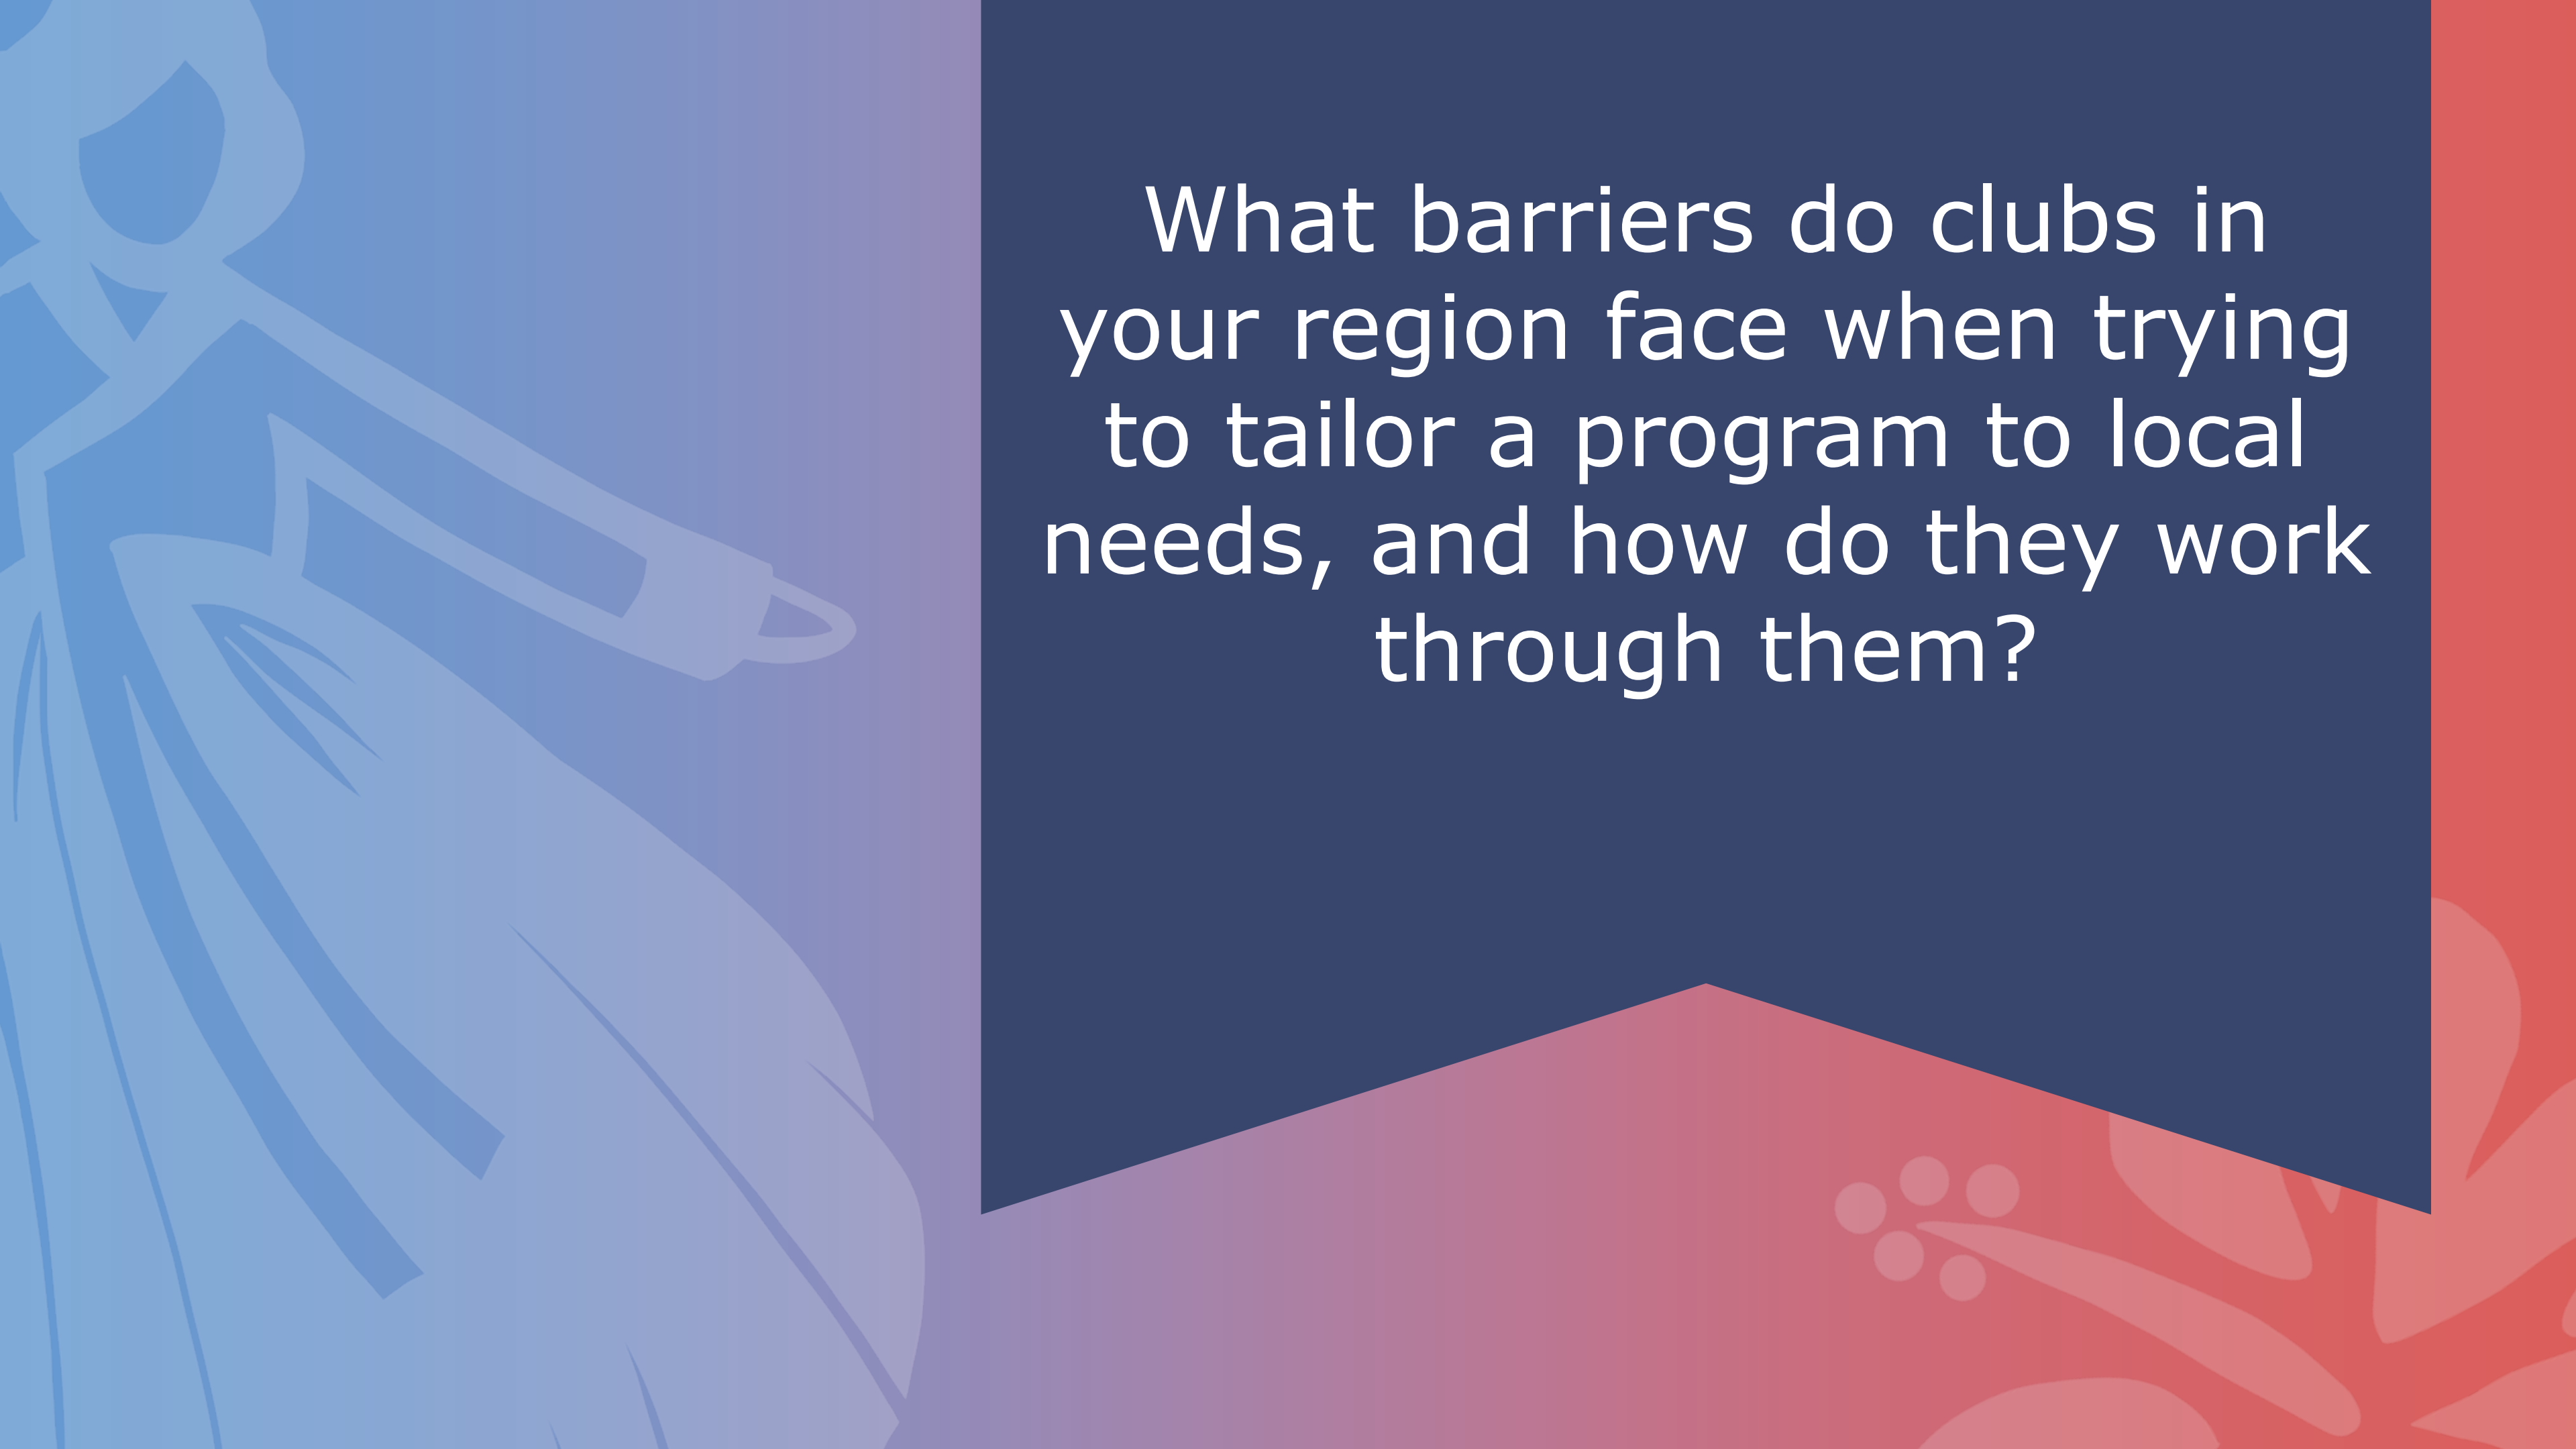

Former Governor
Taiwan Region

How do clubs in your region
assess community needs,
and how does that shape
the way they approach
Soroptimist programs to
meet local context?

Can you share an example of how clubs in your region have adapted a Soroptimist program to better reflect local needs, and what difference it made?

What barriers do clubs in your region face when trying to tailor a program to local needs, and how do they work through them?

How do clubs balance staying true to the program's core framework while still making it feel relevant and accessible in your region?

Can you share an example of a Big Goal Accelerator Project that was adapted to meet eligibility requirements while staying grounded in local context and community needs?

What's the one piece of advice you'd give to a club that wants to launch or adapt a project but doesn't know where to start?

Thank you!
